Prevas wins award at HxGN Live 2023.

Prevas was crowned Outstanding Channel Partner EMIA 2023 by Hexagon. HxGN LIVE Global is an annual conference organized by Hexagon where future-focused automation experts participate from all over the world.

HxGN Live Global took place last week in Las Vegas. The main purpose of HxGN Live Global is to provide participants with a platform for sharing knowledge, experiences, and best practices within Hexagon's technological solutions and services.

The conference also provides an opportunity for attendees to become familiarized with the latest innovations, trends, and future directions within Hexagon's product portfolio. This therefore makes it an important event for those interested in keeping abreast of the latest developments in geospatial and industrial technologies, as well as in networking with peers and experts in the industry.

This year, more than 3,600 attendees from 77 different countries came together at the conference, including professionals, experts, and policymakers from various industries, such as construction, manufacturing, mining, energy, public administration, and more.

Being a strategic partner for Hexagon based on the HxGN EAM solution, Prevas was nominated in two award categories. Representatives from both Norway and Sweden were present and were pleased to receive the news that Prevas was announced as the winner in the category Outstanding Channel Partner EMIA 2023.

Prevas received the award, among other things, for their extensive experience with HxGN EAM and their ability to deliver customer value over time. Prevas' EAM team is highly valued by customers.
