Tip: Send public instead of sending trade items to multiple receivers in the same publication

If you send many trade items to multiple receivers in the same publication, it may take a long time to get receipts back so trade items get status Send to Buyer. It may be better to divide trade items and receivers into several publications.

Another option is to send trade item information publicly. You select this in Prevas GCM when selecting receivers in a publication. The information will then be published in Validoo Item and all receivers who have a subscription that match trade item information will get it sent to their system.

Additional functions in Prevas GCM

Following additional functions are available for Prevas GCM. Please contact support if this would be interesting for your company:

- Send to receivers connected to GS1Trade Sync in Denmark**

It is possible to register and send trade item information to receivers in Denmark. Contact support for more information if you are interested in this and may want to test what this means for your business.
- Adaptation to send trade item information to Systembolaget**

Systembolaget will fetch trade item information from Validoo Item and want their suppliers to have their trade item information available there. Prevas GCM is adapted to meet Systembolaget's requirement of trade item information.
- Export trade item information to Dabas**

The function is available to export validated trade item information to Dabas. For customers connected to the service, Dabas could be chosen as receiver for trade item information in the creation of publications. It is possible make a one-off export of trade item information that needs to be available in Dabas. This creates identical trade item information in both systems and makes it possible to only update trade item information in Prevas GCM. The system will then send all trade item information to both Validoo and to the receivers. Then you only export the chosen trade item information you want to have available in to Dabas. Please contact Prevas GCM support if this sound interesting to you and your company.
- Send from different GLN's**

For a specific publication it is possible to select supplier GLN that trade item information will be sent from. A list of pre-defined user-defined GLN's will be available to select among and trade item information will be sent for selected GLN. Please contact Prevas GCM support if this sound interesting to you and your company.
- Import of trade item information to Prevas GCM**

Prevas has developed various customizations to import trade item information from business systems or other systems via XML, text or Excel format. Please contact Prevas GCM support if this sound interesting to you and your company.
