

New information March 2018

New GS1-releases 2018

- GS1 3.1.4, February, small release
- GS1 3.1.5, May, small release
- GS1 3.1.x, November, probably small release

Prevas GCM is updated according to GS1 releases of trade item information as well as separately a few times a year. Releases may contain new functionality, corrections of errors and improvements, some of them are suggestions that came from Prevas GCM users through the support.

Send trade item information to receivers on Danish market with Prevas GCM

During 2018 Prevas will help its customers send trade item information to recipients in Denmark with the help of their additional service. When a supplier using Prevas GCM needs to send trade item information to recipients in the Danish market, the following applies:

- **Order the service "Send trade item information to target market Denmark"**

The trade item information can then be supplemented with Danish fields, Danish validation rules are run and you can send the data to Danish recipients.

- **You do not need an agreement with GS1TradeSync.** This is based on the need to register the GLN in Validoo Item and not in GS1TradeSync when using a direct link between Prevas GCM and Validoo Item. An individual GLN may only be registered with an individual data pool in the global GDSN network (with data pool called Validoo Item, GS1Trade Sync).

- After the sending of the trade item information to Danish recipients, you can order **quality review of their products via GS1TradeExact**, as required by the larger Danish recipients.

Additional features for Prevas GCM

The following additional features are available for Prevas GCM. Please contact support if this may be of interest to your business:

- **Select GLN at subscription**

Prevas har utvecklat olika kund Anpassningar för att importera artikelinformation från affärssystem eller andra system via xml-, text- eller Excel-format.

- **Export article information to Dabas**

This feature is available to export validated trade item information to Dabas. If the customer has joined this service, you can choose Dabas as a recipient of trade item information when creating publications in Prevas GCM.

- **Import trade item information to Prevas GCM**

Prevas has developed different customizations to import trade item information from business systems or other systems via XML, text or Excel formats.

Development of new functionality in Prevas GCM

Prevas has a great interest in helping Prevas GCM customers simplify their work on handling trade item information. We have long experience of customer-focused partnerships, integrations with surrounding systems and can develop new customized features in cooperation with customers according to their requirements and needs. Prevas has good contact with GS1 and participates in the GS1's user information group for information on current issues as well as providing feedback as a system vendor.

Please contact Prevas GCM support to discuss your specific needs.

Best regards Prevas GCM support team
