

Happy summer from Prevas GCM!

The Prevas GCM team wish both old and new customers a pleasant summer. We will thank all our customers for good cooperation in both support issues and within different projects.

In this newsletter we would like to inform you about integration projects, the Finnish Market, limited support service during week 29-30 and as always inform you about upcoming releases of Prevas GCM.

Have a nice summer and hopefully a great holiday,

Best regards
Prevas GCM team

Current information

Prevas develops integration between business systems and Prevas GCM

Prevas is currently working on several projects where we develop integration of trade item information between our customers' business systems and Prevas GCM both for the Swedish and Danish markets.

We have long experience working with integration between different systems as well as being responsible for operation and support during the systems lifecycle.

Prevas GCM is complemented with the Finnish market

In autumn 2018 Prevas plans to adapt the system with functionality to send trade item information to receivers on the Finnish market.

Already today it is possible to send trade item information to receivers on the Danish market via Prevas GCM.

Prevas GCM has limited support week 29-30

During week 29 and 30, support has closed and therefore support issues like registration and other issues cannot be supported until Monday week 31 when we open as usual again. Acute cases such as being unable to log in or contacting the server, please refer to 054-14 74 40.

New GS1-releases 2018

- **GS1 3.1.5**, was installed in May and was a small release
Following was included in the release:
 - Changes to some names and texts according to GS1 specification version 3.1.5
 - New field T4242 Temperature condition type code in module Temperature
 - Correction of errors and minor improvements in Prevas GCM
- **GS1 3.1.6**, August, small release that not affect Swedish market
- **GS1 3.1.7**, November, bigger release

Send trade item information to receivers on Danish market with Prevas GCM

During 2018 Prevas is helping customers to send trade item information to receivers in Denmark. Here follows more information to order the service Send to target market Denmark:

- **Order service Send trade item information to target market Denmark**
Trade item information can then be completed with Danish fields, Danish validation rules validates data and you can send trade item information to Danish receivers.
- **Order service Select sender-GLN** when sending trade item information to receivers if you need to send from several GLNs to keep your companies Danish GLN.

When a supplier use Prevas GCM to send trade item information to Danish receivers following

applies:

- There is not necessary to have an agreement with GS1TradeSync
- You have to registrate your GLN in Validoo Item and not in GS1TradeSync as you use Prevas GCM, which is connected to Validoo Item. A single GLN can only be registrated at one data pool at a time (with data pool means Validoo Item, GS1TradeSync) in the GDSN-network.
- When you have sent trade item information to a Danish receiver you can order quality control of your products via GS1TradeExact, which is required by larger Danish receivers.

Development of new functions in Prevas GCM

Prevas have great interest in helping their customers of Prevas GCM to simplify the work with trade item information. We have previous experience of close customer collaborations, integration with surrounding systems and developing new customized functions in cooperation with the customer according to their needs and requirements.

Please contact Prevas GCM support to discuss your specific needs.

Best regards, Prevas GCM support team
