

PREVAS GCM NYHETSBRÉV

Happy summer from Prevas GCM!

The team working with Prevas GCM want to wish both old and new customers a nice summer. We are looking forward to some time off during July but will be ready with full power in the beginning of the autumn.

Prevas GCM phone support will therefore be closed during week 29-30 but will open again on Monday week 31. During week 29-30, the support cases will be referred to support.gcm@prevas.se.

We want to thank all our customers for good cooperation and a special thanks to you who tested our latest function, sending to receivers in Denmark. We hope that you have been satisfied with the functionality making it as easy as possible to send trade item information to the neighboring country in the West.

Have a nice summer,

Best regards
Prevas GCM team

Autumn release of prevas GCM 2017

Prevas GCM will have an autumn release in November 2017. This release is larger than the spring release and includes new terms, modules, code values and validation rules.

This release also includes the Danish market.

Additional features for Prevas GCM

- **Send to receivers connected to GS1Trade Sync in Denmark**

It is possible to register and send trade item information to recipients in Denmark. Contact the support for more information if you are interested and willing to test what it means for your company.

- **Customization to send trade item information to Systembolaget**

Systembolaget retrieves, from now on, its trade item information from Validoo Item and wants their suppliers to have their trade item information available there. Prevas GCM is adapted to meet Systembolaget's requirements for trade item information.

- **Select GLN at publication**

Function is available at publishing for selecting sender GLN from a list. The selected GLN will be sent in the trade item information. Please contact Prevas GCM Support for more information about this feature.

- **Import of trade item information to Prevas GCM**

Prevas has developed different customizations to import trade item information from business systems or other systems through XML, text or Excel formats. Please contact Prevas GCM support for further information.

Development of new functionality in Prevas GCM

Prevas has a great interest in helping Prevas GCM customers simplify their work on handling trade item information. We have long experience of customer-focused partnerships, integrations with surrounding systems and can develop new customized features in cooperation with customers according to their requirements and needs. Prevas has good contact with GS1 and participates in the GS1's user group for trade item information for information on current issues as well as providing feedback as a system vendor.

Please contact Prevas GCM support to discuss your specific needs.

Best regards, Prevas GCM support team
