

Innovation for Growth

Press release 09.10.2017

Prevas enters partnership with Nor Tekstil AS

Norway's leading supplier of textile services, Nor Tekstil, has chosen the Infor EAM maintenance system from Prevas for their laundries in Norway.

Nor Tekstil is a company with more than 1,000 employees at 17 laundries in Norway. To retain and further strengthen its market position, the company is continuously investing in new technology to protect the environment and to achieve quality improvements and financial benefits. Nor Tekstil has therefore chosen the Infor EAM maintenance system from Prevas to ensure optimal and cost-effective maintenance for their facilities.

Prevas will be carrying out the project and roll-out will begin at the largest laundries this fall, closely followed by roll-out at the other laundries.

"We have previously used different maintenance systems in our company in the past", says Thomas Karlsen, project responsible in Nor Tekstil and Project Manager for the implementation of Infor EAM. "Using one, standardized solution across our company group however, will enable us to better share experience between our different facilities, learn from each other and optimize our operations. Experience from two of our facilities have taught us that Infor EAM offers us the scalability, user friendliness and functionality important to utilize the solution in different parts of our facilities and the collaboration with Prevas ensures it's adapted to our specific needs."

Infor EAM is developed by Infor Global Solutions and is part of a portfolio of world-leading solutions for the industrial market. The system is one of the world's most widely used Enterprise Asset Management systems with several thousand customers both in public and private sectors and is delivered in the Nordic countries by Prevas, appointed by Infor as one of two European experts within EAM.
