

PREVAS MES

Track'N'Trace

Track'N'Trace Basic Traceability fulfills your traceability requirements.

ITS EXTENSIVE FUNCTIONALITY COVERS AMONG OTHERS:

- Individual traceability
- Serial number generation
- Assembly validation according to predefined rules
- Validation of test status
- Label printing and management
- Access to global repository with standard labels
- Integrates with Zebra and other label printers
- Seamless integration with backend systems
- Online Video instructions for new employees
- Structure report generation
- Global repository with product information (BOM)

Master data is available within the system to facilitate easy startup, ensure quality and avoid local deviations. The user friendly client interface supports several ways of working which makes it easy to introduce in existing work processes. With Prevas Track'N'Trace several existing tools for traceability and labeling may be replaced with one complete solution. Prevas Track'N'Trace is offered either as a cloud solution or as a local installation. New sites can be up and running within a few days only.

Modern modular architecture makes it possible to scale up the system with Extended Traceability functionality and add on other Prevas MES modules for a complete Manufacturing Enterprise Solution.

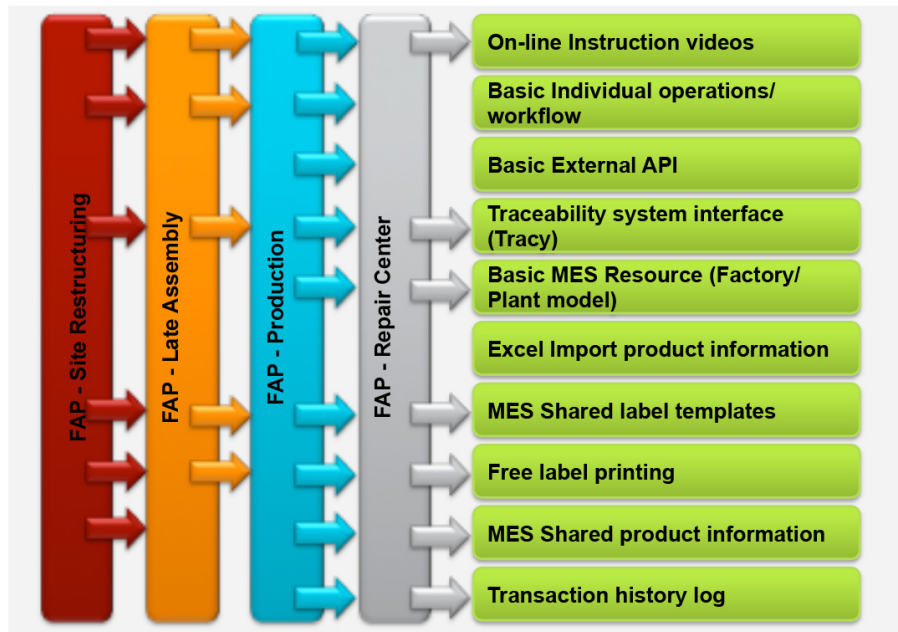

The screenshot shows the 'Change individual' interface in the Track'N'Trace system. The left sidebar contains a navigation menu with options like 'Track And Trace', 'Create SerialNo', 'Register Individual', 'Assembly', 'Change Individual', 'Ship/Unship Individual', 'Store Individual', 'Scrap/Unscrap Individual', 'Search Individual', 'Print Label', 'Individual Print', 'Free Print', 'Product Preparation', 'Site Products', 'Import Products', 'Label Preparation', 'Site Labels', 'Import Labels', 'Serial number Preparation', 'Number Types', 'Number Families', 'Site Settings', 'General', 'Manage Workstations', 'Own Settings', 'Workstation Printers', and 'User'. The main content area has a 'Change individual' header with a 'Serial number' field containing 'A535086332'. Below this are tabs for 'General', 'Structure', 'Additional Numbers', and 'Transaction log'. The 'Structure' tab is active, showing a tree view of the product structure for 'A535086332'. It lists components like '11/COH 109 2081', 'BVG1114489', 'CCAS000135', 'BR38360519', 'BMG 907 037/2', 'BMG 907 027/1', 'TUR6405796', 'TCU 119 2209/1', 'TUR6404623', and 'TUR6523130'. Each component has a status indicator (e.g., 'R1A', 'R1E', 'R1B', 'R1G', 'R1F', 'R1E'). A 'Remarks' section at the bottom states 'Product has structure check set to None'. On the right, there is an 'Add to Assembly' section with a 'Serial number' field and an 'Add' button, and a 'Check complete' button.

The screenshot shows the 'Register individual' interface in the Track'N'Trace system. The left sidebar is identical to the previous screenshot. The main content area has a 'Register individual' header with a 'Serial number' field containing 'A535086332'. Below this are tabs for 'General', 'Structure', 'Additional Numbers', and 'Transaction log'. The 'General' tab is active, showing a 'Register from TRACY' section with a 'Register manually' button. The 'Register from TRACY' section has a 'Register from TRACY' button. Below this is a 'Registration information' table with columns for 'All active requests made by this workstation', 'Waiting for response', 'Processed and validated', and 'Processed with errors'. The table shows 1 request waiting for response, 1 processed and validated, and 0 processed with errors. There are 'Clear All' buttons for each row. Below the table is a 'Pending requests - All' section with a list of requests, including 'A535086332' with a status of 'Waiting for response...'.

FUNCTIONAL AREA PROFILES (FAP):

Prevas MES includes user profiles that give a different user experience depending on the user's site type (Repair Center, Production, Late Assembly or Site Restructuring).

Principle of FAP, Functional Area Profiles

OTHER FEATURES

Simple licensing model, fast access and startup, fast adoption of new functionality, fast updates, data storage on secure location, secure encrypted communication, high reliability and uptime.

SUPPORT

Support available 24/7.

GET-STARTED KIT

Get-started kit is available and includes 1-day web based training and a basic setup and configuration of site base data. Customer data migration kit and additional onsite training is available.

ABOUT PREVAS

With leading expertise in embedded systems and industrial IT, Prevas contributes by providing innovative solutions that create growth. Prevas was founded in 1985 and is the main supplier and development partner to leading companies in industries such as life science, telecom, automotive, defense, energy and engineering. Offices are located in Sweden, Denmark, Norway and India. The company has just over 600 employees. Prevas has been listed on the NASDAQ OMX Nordic exchange in Stockholm since 1998.
